

*Shaping our communities
through vision and action*

XYZ School Board, children and you

XYZ School Board helps to shape your community by making sure public education is of a high quality and meets local needs. As elected officials, school board trustees understand they need to be in touch with the public's concerns and make people aware of what they do and why.

Recently, the board decided to increase its efforts to inform and involve the public so that citizens have every opportunity to have a say in what our children learn. We believe such public awareness and input is vital if our young people are to emerge from public schools as well-educated and well-rounded citizens.

**Call (000) 000-0000 to learn how you can
be more informed and involved.**
